

# Competency-based Education Project

## Open day (28-30 Sep 2021)

British Council, in partnership with Central Board of Secondary Education (CBSE), is working to bring about systemic change in the school education system and move away from rote learning to competency-based teaching and learning. Through hands-on training, we have supported development of test-item writers and upskilled teachers to deliver high quality lessons, which are competency and skill-focussed, rather than content-focussed. In addition to this and for the benefit of all the CBSE schools exemplar material has been developed to support school and teachers to move away from rote teaching and learning to competency based approach. More information about the project and the exemplar material can be accessed [here](#)
